Radio Graetz Spitzen Super W176, 1954

This beautiful and massive radio was built in 1953. The cabinet is finished in walnut-root with golden decoration. The radio has four bands, including FM, and two tuning dials, one just for FM, with single tuning knob. Treble and bass tone controls. Push-pull output stage with three speakers. Power save feature: when the volume control knob is in the normal seating, the plate voltage, and hence the output power is limited; the maximum output power can be reached by pulling out the volume control knob, when the push-pull switch on the shaft rises the plate voltage. Ten tubes plus selenium bridge rectifier: EC92, EC92, EF41, ECH81, EF41, EABC80, EC92, EL84, EL84, EM34, B250C140.

Key features:

- **Five bands: two medium waves**
- **Push-pull output stage; three speakers**
- **Power save switch**
- **Top sound**

Keep them alive!
