

SWEEP GENERATOR SG-24/TRM-3

The SG-24/TRM-3 AM, CW and FM sweep marker generator covers from 15 to 400 MHz in six bands. The marker can be set at one of four crystal controlled frequencies: 200 kHz, 1, 5, 20 MHz. 35 tubes, plus one silicon diode are used into this massive generator. The RF unit is fully shielded inside a die cast aluminum box. The FM deviation can be as high as 20%, the FM modulation being achieved through a magneto-dynamic unit driving the movable part of the tuning capacitor.

Tubes: 6841, 5UP1, 2X2A, 0A2, 5R4GA, 6X4, 0B2, RTF4, 6005, 12AT7, 12AX7, 5814A, 5654, 6481, 5UP1, 2X2A, 0A2, 5R4WGA, 6X4W, 0B2, 3TF4, 6005, 12AT7WA, 12AX7, 5814A, 5654.
