

## TU-129B/APR-9 - Tuning Unit of APR-9

The TU-129B is one of the tuning units accepted by the AIL/Collins APR-9 receiver. The receiver was intended for use as radar early warning, covering from 1000 Mhz to 10,750 GHz. Mounted in several aircraft, including A-1, B-52, B-57, EC-121 and in some British aircraft, as the Valiant, the Neptune or the Vulcan.
