

## 150AVP – 10-Stage Photomultiplier

10-stage photomultiplier. 32 mm head-on flat-surface photocathode, S-11 caesium-antimony semi-transparent surface, visible spectrum sensitivity with peak response in the blue. 10-stage multiplier system, Ag-Mg-O-Cs dynode material.

Anode sensitivity 250 A/lumen minimum at 1800V, 700 A/lm average.

Data for [150AVP](#).
