

1950-0004 – Reflex Klystron

External cavity reflex klystron. Used in the HP 620B EHF signal generator, tunes over a range from 7 to 11 GHz.

1950-0004 is the HP internal code for this klystron which has more than one source, derived as selected [6390](#). The tube in the picture above was made by Beam Tube Corporation, Milford, MA. See also the Raytheon type [QKK1315](#) which fits the same HP specs.
