

24B1 – ‘Trigatron’ Spark Gap Modulator

Three electrode spark gap ‘Trigatron’ for delay line discharge/pulse forming in radar modulator circuits.

Up to 2500 pulses per second repetition rate at 7.2 kV max.

Peak pulse power up to 180 kW.

Special 3-way base with top cap cathode.

STC, Elliott and Mazda-UK are known manufacturers. Data for [24B1](#).
