

28D7 – Double Beam Power Amplifier

Dual power beam amplifier, intended as audio power amplifier in low supply voltage sets.

In push-pull connection, at 28 volts anode and screen supply, 28D7 delivers 220 mW across 6000 ohms.

Heater 28 V at 400 mA.

Used as audio amplifier in several mobile and aircraft radio sets.

Registered to Sylvania in October 1942, RMA record [307](#).
