

## 304H-Gammatron – Power Triode

High-mu transmitting power triode made by Heinz & Kaufman. The tube uses four 75W electrode sets parallel connected. Ruggedized variant of Eimac 304TH. Shorter body, plate pin and grid ring all around the bulb, holding the grid cap.

5V at 26A or 10V at 13A filament.

300W plate power dissipation. 3 kV, 1000 mA max plate ratings. Mu 20.
