

## 3B28 – Xenon High Voltage Rectifier

High voltage xenon rectifier; 10 kV PIV, 250 mA 14 V approximate voltage drop.

5 A at 2.5 V filament.

Extended temperature range replacement for 866A. Ta -75 to + 90°C.

Registered to Chatham in June 1945. Data in the RMA record [415](#).
