

3C27B – UHF Transmitting Triode

UHF transmitting triode rated for pulsed operation. Evolution of [3C27](#), rated for higher duty cycle; integral grid radiator added. Some production lots of 3C27 were uprated by the factory to 3C27B, adding the grid radiator and a 'B' to the code, as in the sample above. Samples of both types can be seen in the [photo gallery](#).

2.5A at 6.3V filament.

National Union, RMA record [605](#), dated September 1947. At the time of registration the 3C27B had already been superseded by the [3C37](#).

Below a sample of 3C27 reworked to 3C27B and its original box. The code was modified adding a 'B' to the old name. (Click to enlarge)
