

4058 – UHF Pencil Triode

Glass pencil planar triode capable of operating up to 4 GHz in pulse service or up to 2GHz in CW. In pulsed operation peak anode current can be as high as 3A.

6.3V at 0.3 A nominal heater in stand-by.

Heater voltage must be reduced to 6.0V when operating. Mu 40, Gm 7.3mA/V.
