

417 – 417A, B and C – Reflex Klystron Family

Black body samples are 417A types, with and without Sperry model 12 tuner. Blue body sample is a 417C. Black body at bottom is a 417B.

Reflex klystron, 2650 to 3330 MHz. B is low-grid-emission variant. Integral cavity, mechanically tuned; coaxial input, output connectors. 250 mW output power with forced air cooling.

Sperry and Westinghouse.

Prefix WL identifies the Westinghouse production.

Similar to [2K41](#), same base.
