

4PR60B / 8252 – Power Tetrode

Ruggedized radial-beam tetrode for radar pulse modulators. 60W anode dissipation, 20 kV, 18A peak. Four pin jumbo-like base, with a notched ceramic dish supported by the central rod. Intended to replace [715](#) and [5D21](#) in airborne radar modulators.

2.25A at 26V filament.

Supersedes 4PR60A.

8252 / 4PR60B was registered to Eimac in 1962. Data in the RMA record [3721](#).
