

## 5803 – Electrometer Tetrode

Subminiature electrometer triode.

Improved 5802.

2.0 gain, 100  $\mu$ mhos transconductance at 7.5V.

100 $\mu$ A anode at -1.7V grid.

1.25V at 10mA filament, 500  $\mu$ A max emission.

Registered to Victoreen in March 1949. Data available in the RMA record [741](#).
