

601 and 602 - Sunvic Hot-Wire Relays

Hot-wire ultra sensitive vacuum relay family. In the above images a 4-pin based model and a flying leads unit at right. In the middle the detailed view of the thin wire loops whose thermal expansion trips the bistable contact mechanism.

One of the samples above operates at 32.0 mA, releases at 31.5 mA. This family was supplied either with four-pin base or with flying wires.
