

## 6TP – Power Beam Tube

This is a variant of 807 with tubular body made by Fivre as standardized power tube for Italian Army. Two used in the transmitter section of the Marelli TR7 or RF1CA and RF2CA, as modulator and RF power stage at 27.2 to 33.4 MHz. Two as RF amplifiers and two as modulators in the Marelli TS2 transmitter, part of the RF3M tank and vehicular communication equipment.

Electrical characteristics similar to those of the popular 807. Suppressor grid to a separate pin.
