

A160034A – Reflex Klystron

External cavity reflex klystron by Polarad. 6.7 to 11 GHz; 4 pin Peewee base, two contact rings to the external resonating cavity, reflector to the top contact.

The tube in the above pictures was probably built by Raytheon as a [6390](#) selected and tested to Polarad specs. Also similar to [QKK1315](#) and to HP [1950-0004](#).
