

ATS70 - Transmitting Tetrode

- Click on the image to enlarge.

ATS70 is a transmitting tetrode equivalent to STC 4282-BZ. Both fit the specification [CV1365](#). Derived from WE [282A](#), they differ for the special low-loss L4 base. This sample has graphite plate. Off-the-center plate cap.

Thoriated-tungsten filamentary cathode. 10 volts at 3.0 amps.

1000 volts max anode voltage. 70 W max plate power dissipation. 20 MHz max full ratings operating frequency.
