

BTL1-1 Transmitting Triode, Forced-Air Cooled

- Click on the image to enlarge

Compact transmitting triode, forced-air-cooled, made by Brown Boveri for use as AF and RF power oscillator or amplifier in TV, FM or SW transmitters. 220 MHz max frequency.

Thoriated-tungsten center-tapped filamentary cathode. 7.5 volts at 20 amps.

4 kv max anode voltage, 4.5 A peak cathode emission. 1 kw max plate dissipation.

1 kg net weight, 130 mm height.
