

## BX1204 – Beam Switch Device

- Click on the image to enlarge.

No data available for BX-1204. The Beam-X family included mainly counters but even devices intended for other functions, as the BX-1203 random noise generator.

According to what appears to be a date code printed on the glass envelope, 6450, the sample above was manufactured in the late 1964.

[The story and the operation of the 'trochotron' beam switching tube can be found in this article.](#)
