

C-2064 Microwave Module

General Electric Microwave Circuit Module, MCM, based upon the GE 14811 planar triode.

70W peak pulses at 4300 +/- 5MHz. 500V plate voltage at 1.7A peak current, 0.01 duty factor.

6.3V at 0.36A heater.

Intended for grid pulsed radio-altimeter transmitters.
