

CV115 – X-Band ATR or TB Cell

CV115 as the standardized code for GEC E1465 TB switch operating in the X-band at 3.2 cm.

The resonator, die-cut in a copper disc, is surrounded by argon at 700 mm Hg.

It was mounted in a short tunable length of waveguide. In production from 1943 to 1946, it was used in the H2S and in the AI MKVIII.

[CV115](#) spec sheet.
