

## CV217 – X-Band Reflex Klystron

X-band reflex klystron, tunable approximately from 3.04 to 3.14 cm. Factory installed flanged external cavity.

1.35 kV resonator voltage, 0 to -100 V grid, -210 to -300 V reflector. 15 mW minimum output power.

4 V at 1.3 A heater.

[CV217](#) spec sheet.

This sample was manufactured by EMI Ruislip.
