

CV2180 - Vacuum Rectifier

Introduced by Ediswan as VX6095, commercial code 19H4, the CV2180 is intended as high voltage rectifier or clipper. Unipotential oxide-coated cathode.

2.5 V at 1.7 A heater, connected at pins 2 and 7, this one also to the cathode.

8.3 kV R.M.S. voltage, 20 kV peak. 30 mA average, 180 mA peak.
