

## CV2341 – Noise Generator Diode

Coaxial 70 ohm temperature-limited noise diode.

10W anode power with convection cooling, rising to 40W with forced-air cooling.

200mA max saturated current giving a life expectancy of 30 hours; at 20mA estimated life is 1000 hours. 200V typical anode voltage for saturation current.

Emission begins at 2V, 2.4A.

5V at 4A max filament ratings.

Spec sheet for [CV2341](#) and [Marconi datasheet](#).
