

CV58 – UHF Diode

UHF diode, designed to be used in balanced or coaxial lines up to about 1GHz as a mixer or up to 3 GHz as detector.

0.05 mm anode to cathode spacing. Very thin body: 13mm dia. by 41mm high, including anode and cathode connections.

6.3 V, 0.36 A heater.

Spec sheet for [CV58](#). See also [CV258](#)
