

## E1T/6370 – Decade Counter

High vacuum counter tube for operation at speeds up to 30,000 pulses per second. Philips and related brands.

An electron beam is switched between 10 stable positions with the beam penetrating holes in the anode to illuminate a fluorescent inner coating. The corresponding digit is printed on the outside of the tube. In the collection also a sample with no printed numbers, see below.

6.3 V at 0.3 A heater.

6370 is the JETEC (RMA) code for the Philips E1T. Data in the [1687](#) record, with the registration to Canadian Rogers in July 1956.
