

## FTL3-2 – Transmitting Triode, Forced Air-Cooled

Power triode for transmission or industrial heating up to 60 MHz. 4.5 kg.

5 kW anode dissipation, with 13 m<sup>3</sup> air flow at 130 mm min water pressure. 7 kV anode voltage, 10 A peak cathode current. 7 kW output power, class C, unmodulated.

Thoriated tungsten directly heated cathode, 12 V at 26 A

Brown Boveri [datasheet](#).
