

KR117 – Reflex Klystron, Integral Cavity

Tuneable reflex klystron, factory-installed cavity, coaxial output.

150 mW minimum output power from 2940 to 3580 MHz. 450V typical cavity voltage, -400 to -100V reflector. 12MHz electronic tuning.

6.3V at 2.4A heater. Heater current must be within the range 0.8 to 1A in normal operation.

SFR, France.
