

## MZ2-200 – Transmitting Triode, Air Cooled

Directly-heated power triode, Mullard equivalent to 412E. Primarily intended for use as AF amplifier or modulator.

275 W anode power dissipation. Two tubes in push-pull class AB amplifier give up to 1.2 kW output power across a 7.6 kilohms load. 14 volts at 2.2 amps oxide-coated filament.

Data for [MZ2-200](#).
