

R9521 – Reflex Klystron, Integral Cavity

35 to 40 GHz, tunable integral cavity reflex klystron, rated for 15 mW minimum output power. Intended for local oscillator in radar or microwave receivers or as pump oscillator for parametric amplifiers. UG-599/U waveguide flange. 6.3V, 0.8A heater.

EMI/US, North Hollywood, CA., U.S.A. known manufacturer.
