

SMC-11A - Klystron Experimental, Frequency Multiplier

Linear beam, frequency multiplier experimental klystron made by Sperry.

Beam voltage 1000 volts, control voltage 0 to -200 volts. 6.3 volts at 1.1 amps heater.

Input frequency 773,3 to 778,3 MHz, output frequency 4640 to 4670 MHz. 400 mW output power.
