

T-5191-P11 – Distributed Deflection CRT

Distributed deflection CRT, used in Tektronix 519 oscilloscopes. P11 high writing speed blue screen. 2 x 6 cm viewing area. Individually calibrated, actual deflection sensitivity and risetime being engraved on the bezel. Bandwidth in excess of 1 GHz at 3 dB. Risetime around 200 ps.

The tube was supplied with factory installed mu-metal shield and Gen-Rad coaxial connectors on the neck, for signal input and transmission line termination.

Actually two of these tubes are installed in the two [Tek 519](#) oscilloscopes of the collection.
