

VA-220 – Reflex Klystron

Integral cavity 5925 to 7425 MHz reflex klystron family, designed to operate as transmitter in microwave relay systems.

1.2 W output to waveguide, 750 V resonator voltage. Suffixes B, C, D, E and F each cover a frequency range of approximately 300 MHz. 6.3V heater.

The sample above is a Varian VA-220B.
