

VT94 - Transmitting Triode (AM 10E/108)

Transmitting triode mounted on low-loss L4 British base. Filamentary cathode.

- 1200 V plate voltage
- 40 W plate power dissipation
- 45 amplification factor.
- 6 MHz max frequency

The tube can be marked as VT94 or with the Air Ministry designation 10E/108, later unified under the title CV1094.
