

## 3B28 – Xenon High Voltage Rectifier

High voltage xenon rectifier

- 10 kV PIV
- 250 mA DC current
- 14 V approximate voltage drop.
- 5 A at 2.5 V filament.

Extended temperature range replacement for 866A. Ta -75 to + 90°C.

Registered to Chatham in June 1945. Data in the RMA record [415](#).
