

6411 / IC-16 – IR Image Converter

I-R sensitive image converter tube. 0.97 inch diameter cathode, 0.75 inch viewing screen. Image magnification 0.68. Peak response at 800 nm.

16 kV accelerating potential, 2 to 3 kV focusing potential.

ITT-Farnsworth, February 1954 registration date. Data in the RMA record [1274](#).
