U.S. Military – I-72 Signal Generator

RF signal generator built during WWII to service SW communication receivers. Simple, yet reliable and quite accurate, it was the workhorse of troops on the combat theaters.

100 kHz to 32 MHz in five bands:

1 - 100 to 320 kHz
2 - 320 kHz to 1.0 MHz
3 - 1.0 to 3.2 MHz
4 - 3.2 to 10 MHz
5 - 10 MHz to 32 MHz.

400 Hz internal modulation.

This sample is in good working order, but the tuning knob is broken and should be replaced.
