# Military R.F. Signal Generator Set AN/URM-26*

The URM26 was the VHF companion of the URM25, with the same shape and using a similar cabinet. It covered the range from 4 to 405 MHz in six bands; output pulse modulated, continuous and AM.

Several versions were produced through the years: the equipment shown is the version SG-117/URM-26B, built in 1975 by the contractor Twenty-First Century Electronics Inc., Riverside, CA.
