Tektronix 531 - Wide-Band Oscilloscope

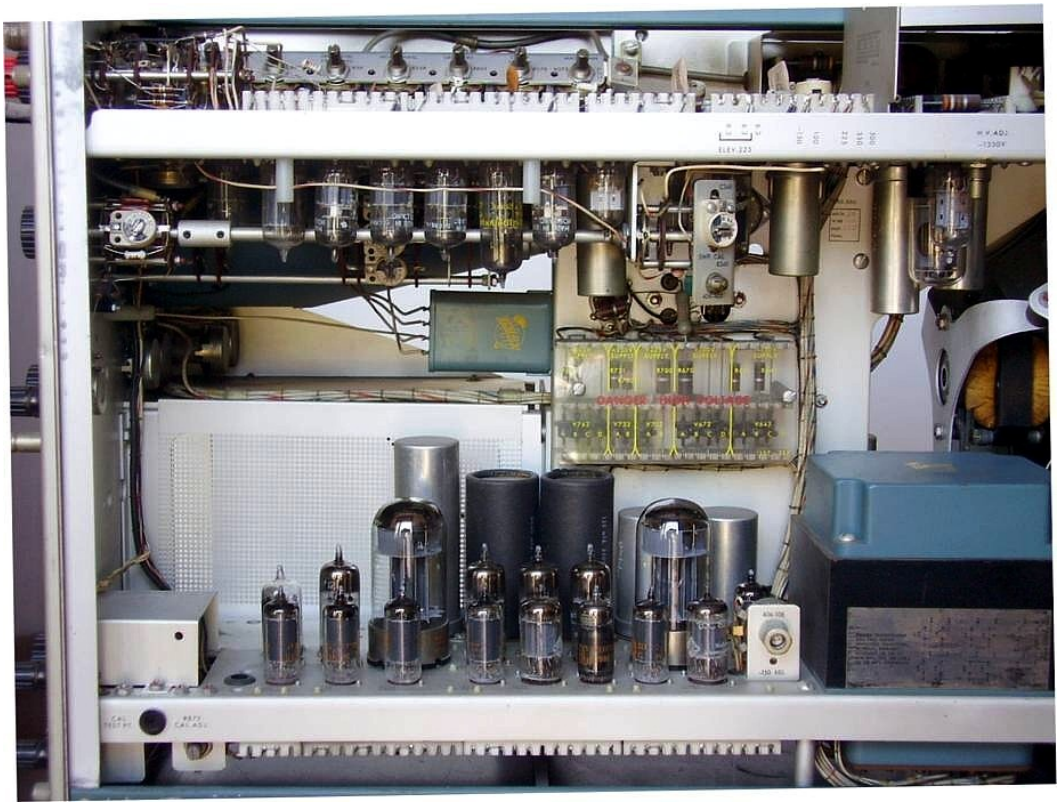

The Tek 531/531A were the simplest of the oscilloscopes designed to accept vertical plug-ins. The 531 was introduced in March 1954, being superseded by the 531A from 1959.

Single time base, 15 MHz vertical bandwidth (depending upon the plug-in). 0.24 µs rise time.

DANGER HIGH VOLTAGE
