

FTL3-2 – Transmitting Triode, Forced Air-Cooled

Brown Boveri power triode for transmission or industrial heating up to 60 MHz.

- 4.5 kg mass
- 5 kW anode dissipation, with 13 m³/min air flow at 130 mm min water pressure.
- 7 kV anode voltage
- 10 A peak cathode current
- 7 kW output power, class C, unmodulated.
- Thoriated tungsten directly heated cathode, 12 V at 26 A

Brown Boveri [datasheet](#).
