

## LD15 – German UHF Transmitting Triode

German Wehrmacht Luftwaffe transmitting triode, capable of pulsed operation as oscillator or as frequency doubler down to 45 cm wavelength.

- 2.5 kV anode voltage up to 12 km, 2 kV max at 16 km.
- 1.5 A peak pulse anode current
- 1.5 kW pulse output power
- 12.6 V nominal at 240 mA heater. 14 V max supply.
