

VT94 - Transmitting Triode (AM 10E/108)

Transmitting triode mounted on low-loss L4 British base. Filamentary cathode.

- **1200 V plate voltage**
- **40 W plate power dissipation**
- **45 amplification factor.**
- **6 MHz max frequency**

The tube can be marked as VT94 or with the Air Ministry designation 10E/108, later unified under the title CV1094.
